

Nginx Proxy Pfad mitgeben

```
location = /{return 301 $scheme://$http_host/weather/;}
```

/weather/ =

Edit Proxy Host

[Details](#) [Custom locations](#) [SSL](#) [Advanced](#)

These proxy details are available as nginx variables:

- `$server` Forward Hostname / IP
- `$port` Forward Port
- `$forward_scheme` Scheme

Custom Nginx Configuration

```
location = /{return 301 $scheme://$http_host/ubooquity/;}
```

⚠ Please note, that any `add_header` or `set_header` directives added here will not be used by nginx. You will have to add a custom location `/` and add the header in the custom config there.
